PROFILE

Futurist, Software Developer, and Space Nerd.

WORK EXPERIENCE

Mobile Developer 12/2016 - present
TicketBiscuit, Birmingham, AL, US

- Build, maintain, and deploy consumer-facing mobile applications built on Android, iOS, and Xamarin
- Automating and improving internal processes, including BitRise
- Work with Product Development to analyze and define requirements for new applications

Software Developer 01/2014 - 12/2016
Altec, Inc., Birmingham, AL, US

- Designed, developed, and supported three cross-platform and native mobile apps deployed to 600+ internal users
- Advocated and assisted with the adoption of Jira, Bitbucket, SourceTree, and Confluence to support goals of Agile development
- Developed RESTful APIs using Spring Boot for mobile consumption
- Worked directly with business units to develop project user stories and guide design

Co-founder 12/2007 - 12/2009
BossHosting, Madison, AL, US

- Provided hosting on virtual private servers for fellow entrepreneurs
- Implemented billing and ticket systems
- Learned definitively what market saturation means
